

MSc and PhD Scholarships

The South African Centre for Epidemiological Modelling and Analysis (SACEMA), within the Centre for Epidemic Response and Innovation (CERI) at Stellenbosch University, is dedicated to improving health outcomes across Africa through epidemiological modelling and data-driven solutions.

Our ideal candidate:

-  has a strong background in the quantitative sciences, including Mathematics, Statistics, Physics, Computer Science, Epidemiology, or equivalent.
-  is innovative and eager to apply their exceptional quantitative skills to real-world health challenges.

We offer:

- Opportunities to work on high-impact research projects that directly contribute to public health solutions.
- A dynamic environment where mathematics meets public health to drive innovation.
- Expert-led training in epidemiological modelling and data science.
