

# SCIENTIFIC SEMINAR SERIES

25 January 2023

Insect biodemography: A 21st century guided tour of concepts, empirical results and novel applications

Time: 12h00 | Wednesday, 25 January 2023

Venue: STIAS, Stellenbosch Campus or virtually\*

Presenters: Prof James R. Carey

James R. Carey is a distinguished professor of entomology at the University of California (UC), Davis and senior scholar at the Center for the Economics and Demography of Aging at UC Berkeley. One of his main disciplinary interests over most of his four-decade career has been on the biodemography of aging. Dr. Carey is the former director of an 11-university NIH-funded program titled “Biodemographic Determinants of Life Span” and the author of nearly 300 journal articles or book chapters. He is one of the few biologists known for a discovery in mathematical demography (Carey’s Equality—life lived equals life left in stationary populations).

\*Please [register](#) in advance for this seminar. In-person attendance is limited to 30. The seminar will be followed by a lunch at STIAS. If you are staying for the lunch, please register by 20 January. After registering, you will receive a confirmation email with information about joining the seminar. We look forward to seeing you at the seminar
