The entangling event of **QSouthAfrica**. July 3-7, 2023

Quantum Computing & Programming Workshop

QWORLD

We are working to build an open quantum ecosystem. We offer free quantum workshops, courses, and internships.

We are pleased to announce the first QBronze Quantum Programming Workshop in South Africa. Join us for the online introductory workshop, *'Quantum Computing and Programming,'* and learn the basics of quantum computing and how to write simple quantum programmes.

Requirements to attend:

Participants should have a basic knowledge of at least one programming language, and they should make themselves familiar with Python before the workshop. We will share the installation instructions and practice notebooks on the basics of mathematics (QPrep).

The level of the workshop is **basic**, so this is a good place to start quantum programming and quantum computing.

Anybody who is interested in quantum computing can register and attend.

Workshop schedule:

- Day 1 | Mon, July 3: 18h30 - 20h00 (CEST)
- Day 2 | Tue, July 4: 18h30 - 20h00 (CEST)
- Day 3 | Thu, July 6: 18h30 - 20h00 (CEST)
- Day 4 | Fri, July 7: 18h30 - 20h00 (CEST)
