

SEMINAR

SpinQ Desktop Quantum Computer for Education and Research

Bruce Liu (SpinQ)

Thursday, 15 June 2023 @ 14h00 SAST

Venue: Physics Seminar Room, Stellenbosch University, and online

ABSTRACT

Attendees will be introduced to:

- 1) SpinQ
- 2) SpinQ Product
- 3) Application and Cooperation

ABOUT SpinQ

Established in 2018, SpinQ is a company that provides one-stop solutions in quantum computing. SpinQ was founded by a team with both international vision and commercial engineering experience.

The SpinQ desktop NMR quantum computer supports pulse sequence engineering at a hardware level. Users can customise quantum circuits on the equipment, and external port programming is allowed. It is low-cost, no maintenance, stable equipment, which is good for quantum computing education and some simple scientific research.
