

## 2024 JSA/HUGS International Fellowship for Graduate Students in Developing Countries

*June, 2024*

December 5<sup>th</sup>, 2023

We are proud to announce the *2024 JSA/HUGS International Fellowship for Graduate Students in Developing Countries* supported by the JSA Initiatives Fund Program\* and US Department of Energy. Under this fellowship we will be able to support the participation of up to two graduate students from developing countries who are well into their PhD dissertation research project to the 2024 Hampton University Graduate Summer (HUGS) program. Students with research interests aligned with Jefferson Lab goals, and interested in collaborative work with Jefferson Lab staff and users will be given priority.

HUGS 2024 is a summer school designed for experimental and theoretical nuclear and particle physics graduate students who have finished their coursework and have at least one year of research experience in these fields. The school focuses on topics of contemporary interest in strong interactions physics, and will run during June 2024. Information on the school can be found at <https://www.jlab.org/education/hugs>

The fellowship will fully cover travel expenses (including international airfare), room, and board. An additional visit of 1 or 2 weeks to Jefferson Lab may be possible, depending on funding, to meet with lab researchers and users, and to initiate or strengthen research collaboration. This visit will be discussed with the selected candidates, and is subject to availability of funds. For more information on Jefferson Lab research program please visit <https://www.jlab.org/>

For further information and to apply, please visit <https://www.uned.es/universidad/facultades/departamentos/fisica-interdisciplinar/investigacion/HUGS.html>. **Applications received by January 20<sup>th</sup>, 2024 will receive full consideration. The applicants will be notified of the results by January 31<sup>st</sup>, 2024. Please forward all queries to Dr. César Fernández-Ramírez at [cesar@jlab.org](mailto:cesar@jlab.org)**

*\* This project is supported by the Initiatives Fund Program, a JSA commitment, to support programs, initiatives, and activities that further the scientific outreach, promote the science, education and technology of Jefferson Lab and benefit the Lab's extended user community in ways that complement the Lab's basic and applied research missions.*
